PROFESSIONAL SUMMARY

Software Quality Assurance Engineer with over three years of experience testing web, mobile, and API platforms. Strong background in Agile environments, end-to-end defect tracking, and release coordination. Proven ability to collaborate with cross-functional teams to consistently deliver high-quality, stable software.

PROFESSIONAL EXPERIENCE

Quality Assurance Engineer

June 2023 – Present

Tabist Japan (Remote)

- Tested multiple web and mobile applications manually to guarantee stability across different devices and platforms.
- Verified backend integrations and data payloads by testing APIs with Postman and GraphQL.
- Organized deployment schedules, collaborating with other teams to balance feature testing and regression testing before major releases.
- Managed test data and verified database using DBeaver and MongoDB Compass.
- Created and maintained detailed test suites in Qase.io for maximum test coverage.
- Verified live environment bugs by analyzing system logs directly in AWS (Lambda and CloudWatch).
- Used JIRA to track defects, coordinate sprints, and keep product and engineering teams aligned.

Quality Assurance

March 2022 – April 2023

PT. Famindo Kunci Sukses — Sunter, North Jakarta

- Analyzed Product Requirement Documents (PRDs) and user stories for strategies and acceptance criteria.
- Created test cases, mockups, and test execution plans using Qase.io.
- Built test scenarios for systematic defect tracking and reporting via MS Excel.
- Conducted critical testing phases across the SDLC, including end-to-end, regression, and user acceptance testing (UAT).
- Managed, investigated, and documented feedback, error reports, and feature suggestions from operational teams and the user community.
- Tested and supported the launch of multiple high-traffic web3 initiatives, including a community platform, KunciPlay mobile apps, an NFT marketplace, and blockchain services (centralized wallet, swap).

EDUCATION

Bachelor of Information Systems

Oct 2017 – Sept 2021

Gunadarma University, Faculty of Computer Science and Information Technology

GPA: 3.57

Vocational High School — Computer and Network Engineering

May 2014 – June 2017

SMK Yadika 11

TECHNICAL SKILLS

Testing: Manual Testing, API Testing, Web & Mobile Testing, Regression Testing, UAT

Tools: Postman, GraphQL, Qase.io (Test Case Management)

Databases & Infrastructure: DBeaver, MongoDB Compass, Amazon Web Services (AWS Lambda, CloudWatch)

Project Management & Collaboration: JIRA, Trello, Agile/Scrum Framework, Google Workspace, MS Office, Notion, Figma, Slack
